

# JIMI FLOYD

Who is Jimi Floyd? How can you be sure?  
Does it matter?

No!.. but it`s a rare band around two-man  
who landed lightyears ago in a small and  
dull village in the Lowlands. Near the  
river clay and fruit trees they explored  
all kinds of different musical worlds.

Sound had always been around for them!  
After dancing and groovin`to phenomena  
like David Bowie, dEUS, Spoon, Wilco,  
Villagers & Kula Shaker they decided to  
get there own music growing and moving.

This first real album turned out space  
infused and astromically driven.  
When you give it some minutes you`ll hear  
whiffs of country flair and weightless  
electro and without a doubt (psychedelic)  
rock & roll!
